

Everitt Laboratory is proud to be a LEED Gold Certified Building

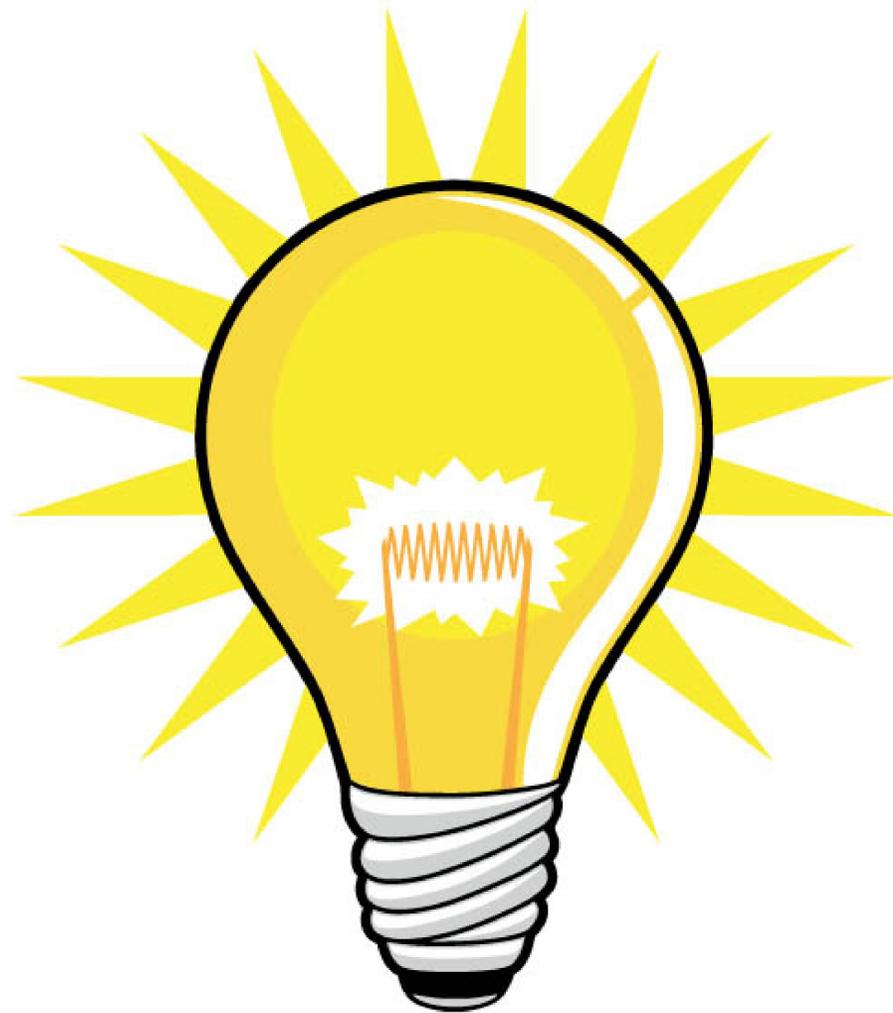

Everitt Laboratory uses 24% less water by using efficient low-flow and dual-flush fixtures.

You can save water by being more cautious of your water usage!

**The Everitt Laboratory uses 26% less energy,
with high efficiency LED lighting.**

**LED lights are 80% more efficient than
traditional lighting.**

**20% of the building materials are recycled,
and 75% of construction materials were
saved from landfills!**

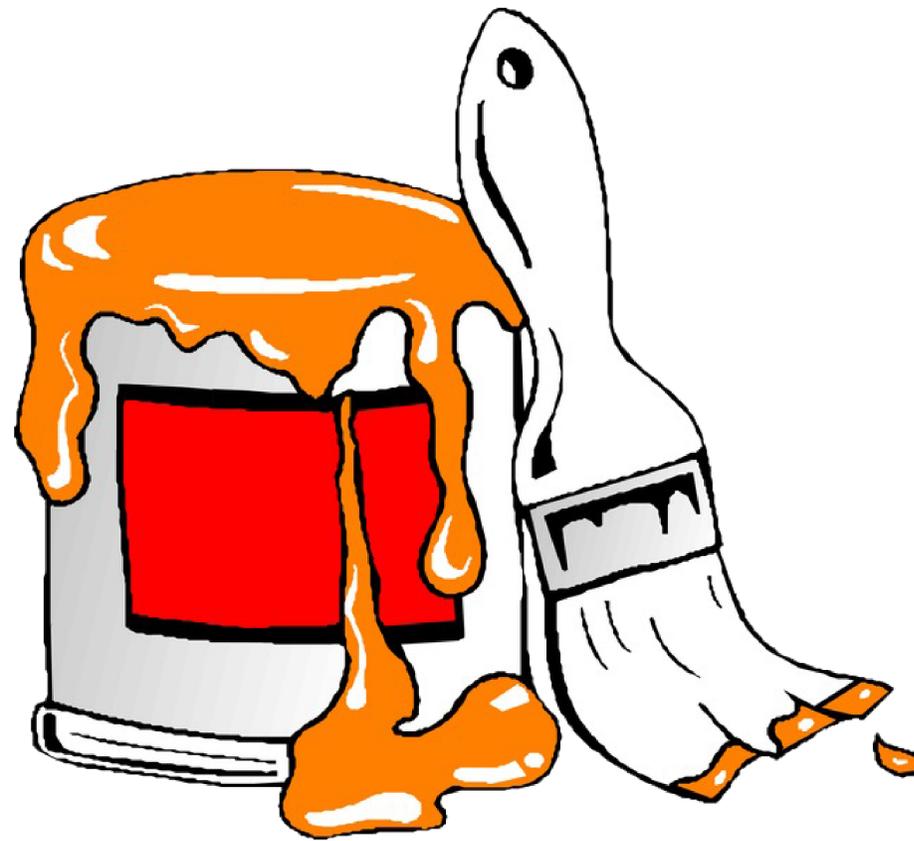

**You can contribute by using the recycle bins
conveniently located throughout this building!**

Everitt Lab provides convenient access to multiple bus lines to be more sustainable.

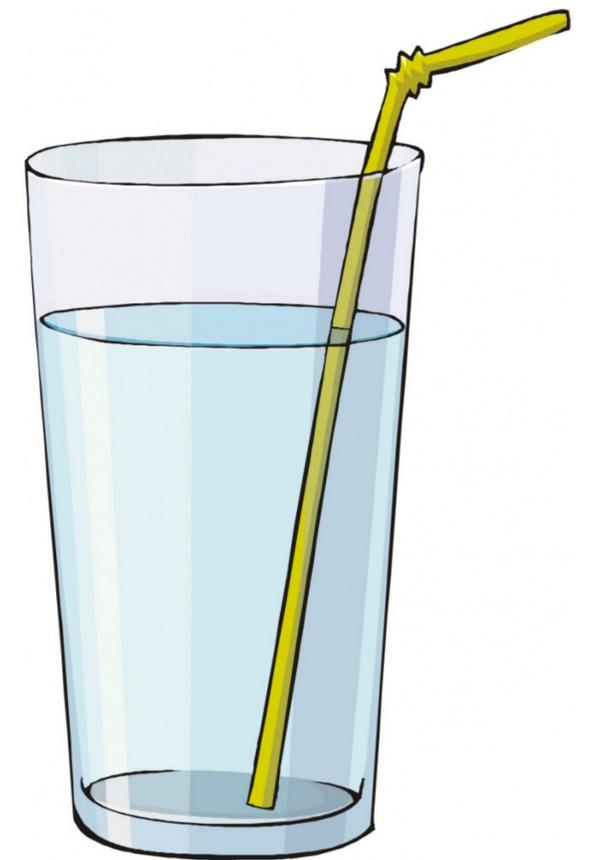

You can be more environmentally friendly by riding a bike to class!

Everitt Lab uses low-emitting materials for adhesives, sealants, paints, coatings, flooring systems, and wood products.

Improving the lives of students for an enhanced learning environment!

You can help contribute by minimizing your impacts on the environment.
